

## PRE-OBSERVATION CONFERENCE

Instructor:

Date:

Theme:

Trail:

Goals/objectives:

What do you want the students to walk away from the experience knowing, understanding and being able to do? What could that look like? How will you know?

What type of explorations or inquiry-based practices or activities will students be doing and how does that connect to your theme? What parts of the *Instructor Support For Guiding Exploration* do you want me to focus on?)

How will you involve students in discussing and making sense of the topic? What parts of the *Instructor Support For Leading Meaning Making Discussions* do you want me to focus on?

What challenges / questions/ concerns do you have about the lesson or activities? Do you have any questions about the science content?

Is there any data I can collect for you while observing?

Briefly walk through the lesson using the learning cycle.
